

## ANGELS & ARCHANGELS

### THE ANGELS

The angels work very closely with the kingdoms of Earth. The first thing to understand about angels is that they do not have free will as humans have. Angels are direct manifestations of the Creator and have no will separate from that of their source. They are like God's right hand. When you pray to God, God does not come Himself; He sends His angels.

There is a hierarchy in the angelic kingdom, just as there are hierarchies in the human, planetary, and solar kingdoms. Angels are governed by archangels; the archangels are the directors, and the angelic hosts do the work. They have specific likes and dislikes and individual characteristics, even though they have been created to perform certain tasks.

The angelic evolution is parallel to that of human beings. The angels who cooperate with the Spiritual Hierarchy of Earth are focused on the form aspect of the planet; the Hierarchy is focused on the consciousness that lives within the form.

Because angels do not have free will, they are not yet self-conscious as humans are. They evolve through feeling, rather than through the power of conscious thought. Angels seek to feel, whereas human beings seek to know.

It is important to understand that there are angels working in all the dimensions of reality. The angels of the higher planes consciously cooperate with the Hierarchy and are considered equal to all ranks and grades within the Hierarchy.

Angels are genderless, or maybe a better term is androgynous - they have both male and female characteristics. The word angel itself is derived from the Greek word 'angelos' which means messenger. They are the heavenly messengers of the universe.

The goal of the devic, or angelic evolution is to become human in a future cycle. This occurs for all devas below the rank of solar pitris ('pitris' is an esoteric word meaning angel). Also, on occasion, it is possible for humans to enter into the angelic kingdom. Angels can incarnate into physical bodies and take on human form, so some of the people you know might actually be angels rather than humans. At some point in the far and distant future, it is part of the divine plan that these two evolutions come together. Angels who have not yet achieved individualization and free choice will eventually be pulled back into Source, ceasing to exist when their missions are complete. Some angels actually do have wings.

There are many different kinds of angels. The angels most people are familiar with are called, simply, 'angels', but there are many other names for them as well.

The angels are the beings humans are most familiar with, for they are the ones who work more closely with humanity. The angels who are the worker bees work under the direction of the archangels. Each person has a guardian angel. There are infinite numbers of angels who work with humans and are available. There are angels of healing, illumination, creativity, nature, music, dance, writing and literature, protection, emotions, politics, science and technology, devotion, purity, information, salvation, environment, transformation, peace, art, relationships, and ceremonial order and magic. All you really have to do is invoke them and they are happy to come and serve.

## **THE ARCHANGELS**

The archangels have a higher rank than the angels. In some systems of thought they have been called the overlighting angels, since they serve larger areas of human life. It is the archangels whose names you are most likely to be familiar with, especially the archangels who head the seven rays. Each archangel has a feminine counterpart.

With regards to the "twin flame" references, the Angelics were expressed firstly as a singular spark of the Divine, with a specific remit associated with the distribution of the Light of the Divine (All That Is). The Angelics ARE a singular unified energy with roles to play throughout all the planes and Dimensions of reality, just as we too are merely aspects of the Divine, struggling to remember who we are and reunite with our True Self. It may be easiest therefore to see each Angel as simply an aspect of a Unified Reality, just as our physical body is a complete life-form, yet is composed of many organs and systems that each have an individual function to perform in order for that physical body to exist. Each Angelic aspect has two polarities, required for the fullest possible expression of their Light.

These are what we describe as "masculine" and "feminine": twin-flames of the One Flame. I like to see them symbolized as an infinity loop: one form, yet with two sides. The crossing point exemplifies their True Unified nature: the further away you travel from this to either side the greater the influence of the male or female polarity.

## **THE ARCHANGELS MISSION ON EARTH:**

### **Lord Michael & Lady Faith**

Lord Michael's primary task is to cleanse Earth's atmosphere and the auras of all humankind of all lower thought-forms, dissolving all that is not perfect or of the Highest vibrations. He wants to show all sentient beings the path back to God when they have strayed, and will not rest until all souls are purified. Michael also has taken on the role of Protector and Guardian of mankind, and is relentless in his protection and defence of those who wish to live in the Light. He is committed to help all souls who call on him and will always assist in whatever action is necessary to bring about justice and resolution. ... He is one of the guardians of karma, and can also help us to work with and clear any karma or karmic entanglements we have with each other. In his work with us on the first Ray he wants us to develop our own strength and willpower and to both recognize, accept and integrate our shadow aspects. In our daily and Spiritual lives he gives us the strength to stand up and fight for what is Right and Light, and to also recognize our own Truths and stand up for them.

### **Lord Jophiel & Lady Constance**

Lord Jophiel brings Divine Light and Wisdom to us, connecting us with all levels of consciousness within the material and spiritual worlds. All information, ideas, perception and knowledge flow through him. Jophiel helps us discover abilities and strengths that we may not know we had. He is the source of our inspiration and our guide in how to apply the information we gain in accordance with the Divine plan and in accordance with Divine Laws. By gaining wisdom we are taught to practice discernment, which encourages our evolution and progress for our Highest good To help do this, he forms links within our crown chakra and outer bodies of the aura and connects them up and out to the higher chakras and higher levels of vibration, helping us to become full and complete Beings of Light. We then align ourselves with our Divine Self and assume the role that is ours with a true sense of purpose and strength. It is only by knowing and understanding that all that is out there is a part of what we are that we will become complete.

### **Lord Chamuel & Lady Charity**

Lord Chamuel acts to channel God's love, whilst Charity's role is best described as "compassion in action". Together they act to help us develop our heart chakra and bring through the attributes of compassion, balanced love of Self and the unconditional extension of that Love for oneself to others. ... Chamuel brings a sense of deep peace and trust, teaching us to trust in life and in the reality of the Divine. He empowers us to love ourselves and to connect with others with compassion and understanding, opening our

eyes to see the Divine within everything and everyone. He brings a remembrance of our true Being, perfection and Divinity and reminds us how to connect with the love and abundance of existence. He asks us to be selfless. This is the act of extending unconditional love outwards, even to those who we feel "do not deserve" it. In this way we understand the principle of Divine Love. Divine Love shows that we are all one and mends the illusion of separation from God. What we give out, we receive back ten-fold and so being selfless is actually self-love, because by helping others so we help ourselves. God is Love, and love is the most potent creative and healing force in the Universe. Love melts disharmony, fear and imperfection. It is joyful, beautiful and buoyant, uplifting and inspiring us to spread its wonder and our joy of life to others.

### **Lord Gabriel & Lady Hope**

Lord Gabriel's task is to help us see, understand and deal with the irritations, anger and fears that stop us from being in our own natural state of Joy, and to appreciate what a blissful thing it is to be happy and content. Gabriel Inspires our Inner Flame: Secondly he ignites the flame that dwells in each of us, which is our Divine spark or our Inner Light, and then as we respond to our own spirituality he helps us to move forward using our past experiences, and supports our Inner Knowing on the path we have chosen to take in this lifetime. On our way he also gives us the strength to accept and live with the changes we may have to go through, which may not always be pleasant or very comfortable. He always tries to encourage us by giving us a sight of the good things to come at any times of change. He may do this by helping us to understand visions and glimpses of the future (which may come to us in the form of dreams, synchronicities or symbols) that may aid us and reassure us in our tasks.

### **Lord Raphael & Mother Mary**

Lord Raphael's main attribute that we associate him with is, of course, healing and he is charged with healing both our planet Earth as well as all of her inhabitants. For humanity this is not limited to our physical bodies. He is the true holistic healer who recognizes that our feelings, thoughts, emotions, situations and how connected we are to God (and our Life purpose) all contribute to our health, or lack of it. He may also be called upon for healing of the animal and plant kingdom. As a part of his role for healing humanity, he is also responsible for healing between nations - quite a task when so many people live in conflict. ... The colour with which Raphael is often associated is green. This colour represents nature, healing, balance, renewal and harmony. Raphael's energy to us is soft and enveloping and balm-like. It feels cleansing and clarifying as well as nurturing and healing, and although it is very gentle it is amazingly powerful. ... Raphael heals us by restoring us to perfect order through connecting us with the power of Divine love. And when we have turned away from love he brings ways to show us it is always around us, even if we cannot or will not see it. He nourishes and strengthens us, allowing us to be

rejuvenated, regenerated and renewed on all levels, and to help us help ourselves he guides us to find the right healer, then supports us in our healing process and finally supports us in remaining healthy. When the situation is not directly of our making, he will intervene when lives are injured by chaos, disorder and war. He is always there in the background mopping up after our mistakes yet constantly reminding us of our choices and our potentials, and showing us the path back to unity and God. Above all he is our comfort and our guiding Light.

### **Archangel Uriel & Lady Aurora**

On the Rainbow Bridge of the Rays between the Earthly and the Divine, Archangel Uriel watches over the earthly side and Metatron the heavenly side - each one monitoring and regulating what passes from one to the other. Metatron's province is the void, which is the place wherein lies the potential for the creation of all and any thing.

Uriel's province is that of order, structure and materialization (the formation of matter through thought and word) for all Beings here on Earth. He is a Master of Form and understands and directs all sacred form, using the blueprints contained in what is known as "Metatron's Cube" or Matrix.

### **Lord Tzadkiel & Lady Amethyst**

Lord Tzadkiel and Holy Amethyst came to Earth bringing the flame with them many aeons ago in order to transmute millions of years of mis-qualified energy that had accumulated within the Earth's energy fields and to introduce the Age of Ritual, Science and Alchemy. As you may expect therefore, Tzadkiel serves on the seventh Divine ray which is violet, and which is a synthesis of the attributes of the other six rays.

Tzadkiel is also High Priest of the Order of Melchizedek, and initiates potential members as priests and priestesses of the order. The Order of Melchizedek is a Cosmic Order and priesthood. The underlying principle of the Order for us on Earth is to prepare us for our transition into the fifth dimension (or what we refer to as Ascension) by mastery of the four planes of matter.

The work of the Order is much more vast than this however, as it supports the same spiritual principles for worlds within other Galactic centers and other Universes. The name "Melchizedek" may be given to any initiate of the Order who has passed the seven levels of initiation into the Order and many of the Great White Brotherhood, including many Ascended Masters are members.

Priesthood is automatically carried over to future incarnations, although the Order also initiates people when they are incarnate, as happened to Abraham, Moses and Jesus. Many of the Starseeds and Lightworkers currently incarnated are already members of this Order, whether they are conscious of being so or not.

The Etheric retreat of Tzadkiel and Amethystia, Holy Amethyst, his twin flame is in the Etheric realms above Cuba and known as the Temple of Purification. There is a focus of the violet flame, and the gathering place of the Angels of the Violet Flame and the Angels of Transmutation. This temple was originally raised in Atlantis and was the retreat for the Priests and Priestesses of the Order of Zadkiel, who used the violet flame and the purity of their own etheric bodies to work to remove negative energetic debris from the towns and cities of the civilisation. Today the retreat is also a focus for all members of the Order of Melchizedek, of all times and from all Dimensions.
